

**TIMETABLE of  
LABORATORY CLASSES  
ANATOMICAL PATHOLOGY  
for the students of III year «General Medicine»  
Autumn semester**

| <b>Week</b> | <b>Date</b>      | <b>Topic</b>                                                                                 |
|-------------|------------------|----------------------------------------------------------------------------------------------|
| 1           | 01-05.09.2025    | Introduction to pathology and anatomical pathology                                           |
| 2           | 08-12.09.2025    | Cell injury and adaptation                                                                   |
| 3           | 15-19.09.2025    | Cell death. Necrosis and apoptosis                                                           |
| 4           | 22-26.09.2025    | Pathology of inflammation                                                                    |
| 5           | 29.09-03.10.2025 | Regeneration and Repair                                                                      |
| 6           | 06-10.10.2025    | Hemodynamic Disorders                                                                        |
| 7           | 13-17.10.2025    | Pathology of neoplasia                                                                       |
| 8           | 20-24.10.2025    | Control lesson 1                                                                             |
| 9           | 27-31.10.2025    | Pediatric and genetic pathology                                                              |
| 10          | 03-07.11.2025    | Perinatal and childhood pathology                                                            |
| 11          | 10-14.11.2025    | Pathology of immune diseases                                                                 |
| 12          | 17-21.11.2025    | General pathology of Infectious diseases. Viral infections.<br>Perinatal infectious diseases |
| 13          | 24-28.11.2025    | Pathology of bacterial, fungal and protozoal infections                                      |
| 14          | 01-05.12.2025    | Blood pathology                                                                              |
| 15          | 08-12.12.2025    | Control lesson 2                                                                             |
| 16          | 15-19.12.2025    | Credit lesson                                                                                |

Head of Chair – Tumanova E.L., MD, PhD, D.S., Professor

Head of Education – Simonova N.A., MD
